

CHFA Taxable Bond Financing for Use with the 2017 9% LIHTC Round

Terms

CHFA has made available construction and permanent taxable bond financing for use with the 2017 9% LIHTC applications. CHFA will use its standard construction to permanent financing structure with two promissory notes: a construction note and a permanent note. Each note will have its own rate, loan amount, and term. Beginning at the initial closing and through the duration of the construction period, the notes will accrue interest, respectively, based on the construction note rate and the permanent note rate with no principal amortization. Interest payment will be due and payable on a monthly basis, in arrears, and may be capitalized in the development budget.

It is anticipated that, upon maturity, the construction note will be retired with other development financing or equity proceeds. At maturity, the permanent loan will automatically begin amortizing at the rate and term specified in the permanent note.

For the purposes of initial loan sizing at the application for a letter of financing interest, CHFA will assume a construction rate of 4.40% and a permanent rate of 5.75%. At the time of rate lock, the final rate for the construction loan will be based on the 1-month LIBOR rate plus 240 basis points and the permanent loan will be based on the 10-year treasury rate plus 275 basis points.

The terms of this financing are as follows:

- Construction Loan Rate – The final fixed rate will be based on the 1 month LIBOR rate *plus* 240 basis points. This rate will be locked consistent with CHFA's rate lock procedure and current CHFA [guidelines](#).
- Construction Loan Term – This term may not to exceed 24 months.
- Construction Loan Amortization – Interest only payments are due until maturity.
- Construction Loan Early Prepayment – Prepayment is available beginning in month 16 provided the construction loan proceeds have been disbursed in full.
- Permanent Loan Rate – This fixed rate will be based on the 10-year Treasury rate *plus* 275 basis points. This rate will be locked consistent with CHFA's rate lock procedure and will follow current CHFA [guidelines](#).
- Permanent Loan Term – The permanent term may not exceed 22 years.

- Permanent Loan Amortization – The permanent loan will have an amortization term of 35 years. Monthly amortization payments of principal and interest will commence on month 25.
- Permanent Loan Early Prepayment – With this special financing, prepayment is not permitted.
- Permanent Loan Early Amortization – With this special financing, the construction/permanent loan must continue to make interest-only payments through month 24. Amortization will commence in month 25.
- Disbursement – Both the construction and permanent loan proceeds will be disbursed on a pari-passu basis during the construction phase of development.
- Loan Origination Fee – This will be based on current [guidelines](#).
- Bond Cost of Issuance – The costs of the taxable bond issuance will be absorbed by CHFA.
- Eligible Projects – Only projects applying for the 2017 9% LIHTC round are eligible. Other projects (including 9% LIHTC awardees from previous years) are not eligible.
