III. TABLE – HOUSING NEEDS INDEX	4
IV. TABLE – LOCATION INDEX.....	8

I. Housing Needs Index

CHFA uses two criteria to measure the housing need in each of Connecticut's 169 towns and municipalities. The first uses HUD's determination that any household paying more than 50% of their income on housing is extremely cost-burdened. By using data in the US Census, we can determine how many households in a given area are extremely cost-burdened and therefore, we can determine where there is the greatest lack of affordability. Secondly, CHFA reviews new household formation in a given area to determine where the greatest pressure for new affordable housing opportunities exists.

This Housing Needs Index is used in the competitive 9% LIHTC round to determine the points award that may be anticipated in the "Housing Needs & Location" points category.

II. Location Index

To help target resources through the LIHTC program in a geographically balanced approach, CHFA developed the Location Index. High resource and very high resource communities across the state were identified by an analysis of census tract data utilizing specific metrics including school performance and income levels.

Location Set-Aside:

The Location Index is to be used in the competitive 9% LIHTC rounds in 2027 and 2028 to determine a Completed Application's eligibility for the Location Set-aside. Eligibility is first determined through scoring. To be eligible for consideration in the Location Set-aside, no Completed Application's score shall be lower than 85% of the highest scoring Completed Application in the round.
