

**CHFA 299 Request for Proposals (“RFP”) – Snow/Ice Removal Services
as of October 19, 2026:**

Question: The form requires pricing for certain snowfall in inches. Can firms propose a different measurement of snowfall than proposed?

Answer: Please add a separate sheet if different levels of snowfall are proposed.

Question: Will firms be able to walk the property prior to bid submittal?

Answer: Respondents are encouraged to walk the property prior to bid submittal.

Question: Our company plans to bid as the prime contractor and use a local snow contractor for field work. May we include the subcontractor arrangement in our proposal, and what documentation is needed to request written approval for this?

Answer: Please include information about any proposed subcontractor in your proposal. Approval of a subcontractor would be done during contracting if your company is selected.

Question: Exhibit A asks for per-storm prices by snow depth, with deicer included. Would CHFA also accept a fixed seasonal base price with separately billed salt/ice melt and hourly rates for extra work, or must all proposers use the per-storm format only?

Answer: Please feel free to submit a fixed seasonal base price with separately billed salt/ice melt and hourly rates for extra work on a separate sheet of paper.
